

ACCIDENT MANAGEMENT

Accidents happen.

What matters most is what you do next. One call to us can save you thousands. We can reduce administration and get your equipment and driver back on the road.

Purpose-Driven Accident Management

When an accident occurs, one call to us connects you and your team with the right service professionals.

We manage accidents with three purposes in mind.

First, we do everything we can to lower the costs associated with the event.

Second, we secure your customers' cargo and work to get it where it's supposed to be.

Third, we move to get your equipment repaired and back on the road as quickly and inexpensively as possible.

What to Expect

Our recovery services include:

- Winchout
- Trailer lifts
- Medium and heavy-duty wreckers
- Rotators
- Police call management
- Photos and scene documentation
- Hostile provider oversight
- Invoice review and negotiation

When police are called we'll work with dispatchers to send in-network towing companies offering lower rates. When this isn't possible, we'll negotiate with police-sponsored towing companies to ensure fair pricing.

WANT TO KNOW MORE ABOUT TTN?

There's no better partner for fleet owners, operators, or maintenance managers. We resolve the challenges facing fleet maintenance professionals. To arrange an introduction, contact your TTN Fleet Representative or email sales@ttnfs.com
